SNEZHANA DOSINOVA

FRONTEND DEVELOPER

Varna, Bulgaria | On-site | Hybrid | Remote | sdosinova@gmail.com | sdosinova.com
linkedin.com/in/snezhana-dosinova | github.com/snezhanadosinova

SUMMARY

Frontend Developer with 6+ years of experience building and maintaining ERP/CRM systems, internal business applications, and WordPress projects. Experienced in turning UI designs into responsive and interactive interfaces, developing reusable UI components, and implementing JavaScript functionality for business applications.
Worked with REST APIs and backend data, and collaborated closely with designers and backend developers on new features, UI improvements, and ongoing application development. Experienced with HTML, CSS, JavaScript, Tailwind CSS, and Bootstrap in production environments.
Currently building projects with React and TypeScript, with a focus on modern React-based frontend development.

TECHNICAL SKILLS

Frontend
HTML5 · CSS3 · JavaScript (ES6+) · React · TypeScript · Tailwind CSS · Bootstrap · jQuery · Chart.js

CMS & Templating
WordPress · PHP · Blade · Twig

Tools & Workflow
Git · REST APIs · Docker · Figma · Storybook · Canva · Cursor · Codex · Claude Code

PROFESSIONAL EXPERIENCE

Frontend Developer
BPO Software Solutions | Jan 2020 – Mar 2026

- Built and maintained responsive interfaces for ERP/CRM systems and internal business applications, including dashboards, data tables, forms, filters, reports, and user management screens.
- Developed interactive UI components such as modals, charts, and dynamic form elements using JavaScript, Tailwind CSS, and Bootstrap, and integrated frontend functionality with REST APIs and backend data.
- Built and maintained custom WordPress plugins and functionality using PHP, JavaScript, and jQuery.
- Worked with designers and backend developers on new features, UI improvements, bug fixes, and ongoing maintenance of production applications.
- Created responsive HTML email templates for marketing and business communications.

Frontend Developer
411 Marketing | Sep 2019 – Jan 2020

- Converted UX/UI designs into responsive web interfaces using HTML, CSS, JavaScript, Bootstrap, and Tailwind CSS.
- Built interactive frontend components with a focus on usability and cross-browser compatibility.
- Worked with developers and designers on internal dashboards and business tools.

Link Builder
411 Marketing | Jun 2018 – Aug 2019

- Managed business directory listings and supported SEO and link-building activities.
- Worked on improving website visibility and search engine indexing.

EDUCATION

Master’s Degree — Web Design and Digital Marketing
VFU Chernorizets Hrabar | 2020–2023

Bachelor’s Degree — Information and Communication Technologies in the Marine Industry
NVNA Nikola Vaptsarov | 2016–2020

ADDITIONAL INFORMATION

- **Languages:** English
- **Current focus:** React, TypeScript, Next.js
- **Professional traits:** Organized, collaborative, detail-oriented, and able to prioritize tasks effectively
- **Professional development:** Continuously improving technical skills and keeping up with modern frontend technologies

SELECTED PROJECTS

Personal projects focused on React, TypeScript, component-based UI development, API integration, and modern frontend workflows.

Movies Collection App

React · React Router · TanStack Query · Tailwind CSS · Firebase · TMDB API · Docker

GitHub: github.com/snezhanadosinova/movies-collection-app

- Built a responsive React application for discovering movies and TV series, exploring cast information, and managing personal favorites.
- Worked with TMDB API data, routing, search and filtering, infinite scrolling, loading/error states, and Firebase authentication.
- Used TanStack Query for asynchronous data handling and Firebase/Firestore for user accounts and favorites.

Collab Time Analyzer

React · TypeScript · Tailwind CSS · Recharts · Docker

GitHub: github.com/snezhanadosinova/collab-time-analyzer

- Built a React and TypeScript dashboard that processes employee project data from CSV files and analyzes shared working periods.
- Worked with date-overlap calculations, CSV data processing, employee collaboration rankings, and interactive chart visualization.
- Used Recharts for data visualization and Docker/Docker Compose for the development environment.

React Design System

React · TypeScript · CSS Modules · Storybook · Docker

GitHub: github.com/snezhanadosinova/react-design-system

- Built a collection of reusable and typed React UI components, including buttons, form controls, cards, modals, drawers, and layout components.
- Worked with component variants, design tokens, CSS Modules, and light/dark theme support.
- Used Storybook for component documentation and isolated UI development, with Docker support for the development environment.
